

THE LEAD-TO-CASH SYSTEM

Four phases. Sixty days. This is how those three numbers move.

1

THE NUMBERS NOBODY EVER SHOWED YOU

DIAGNOSIS

EVERY LEAK, IN RUPEES

WEEK 1-2

- ✓ **A proper session with you first** — what you think is broken, and what you have already tried to fix
- ✓ **Your real calls, not a questionnaire** — I listen to how your deals are actually won and lost
- ✓ **Then the numbers you have never had** — you know your cost per lead. You probably don't know your cost per show-up, your revenue per lead, or your LTV to CAC ratio
- ✓ **And a target on each one** — so on day 60 there is a scoreboard, not an opinion

Akshay: Almost every founder can tell me their cost per lead in two seconds. Almost nobody can tell me what a booked call actually costs them — and that is usually where the money is going.

2

SELLING WITHOUT SOUNDING SALESY

CLOSING

MORE YES, AT A HIGHER PRICE

WEEK 3-4

- ✓ **A pitch built around how much they already know** — unaware, problem-aware, solution-aware, or ready to buy. Four different conversations, not one script.
- ✓ **Your own best call turned into the standard** — so the version that wins stops being an accident
- ✓ **Every objection answered before it arrives** — including price, so you stop discounting to rescue a deal
- ✓ **Pre-call and post-call frameworks** — they turn up warm, and they buy again afterwards

Akshay: Nobody sounds pushy because of the words they use. They sound pushy because they are pitching someone who is not ready to hear it yet.

THE THREE NUMBERS ALL OF THIS MOVES

50%

more of your leads say yes

50%

more from every deal you close

50%

fewer lost after the first call

These three don't add up. They multiply. That is where 3X comes from.

3

SEVEN SYSTEMS, BUILT AROUND YOUR BUSINESS

AI SYSTEMS

70% OF YOUR PROCESS, AUTOMATED

WEEK 4-5

Custom-built to your offer, your pricing and your actual calls — then installed and handed over. AI agents running on WhatsApp and email. You own all of it.

- 1 **Nurture Engine** *A lead comes in, before the call*
They turn up knowing who you are, instead of cold
- 2 **Reminder System** *24 hours and 1 hour before the call*
No-shows you are already paying for
- 3 **Follow-Up Engine** *The call ends with no decision*
The seventh touch nobody ever makes
- 4 **Reactivation Engine** *A lead goes quiet for 30, 60 or 90 days*
Dead leads you paid for once and never used
- 5 **Upsell Flow** *A client hits a result or a milestone*
Revenue left sitting on the table
- 6 **Cross-Sell Flow** *A client needs the thing next to what they bought*
The second sale nobody ever offers
- 7 **Referral System** *A client gets the outcome you promised*
Referrals that only happen by accident

Akshay: You don't have a follow-up problem. You have a "someone has to remember" problem. Systems don't forget, and they don't have a bad week.

4

DAY 60 BECOMES YOUR NEW FLOOR

AUTOPILOT

3X, AND STILL CLIMBING

WEEK 5-8

- ✓ **A dashboard that shows where deals are dying** — you stop guessing, for good
- ✓ **A simple weekly review that actually happens** — every call teaches you something instead of vanishing
- ✓ **The system gets better every month** — the pitch sharpens, the follow-up gets smarter, the numbers keep climbing
- ✓ **You own all of it** — it stays in your business whether I am there or not

Akshay: Most businesses have one great month, then spend the next six trying to remember what they did differently. This is the part that makes sure you never have to guess again.

DAY 60 → UP TO 3X REVENUE

And it does not stop there. The system keeps improving after I step back.

Sixteen pieces, built from your own calls and your own numbers. Your baseline is locked before week 1 — and I am paid on what we add above it.
